15 OCT 1981

MEMORANDUM FOR: Chief, Physical Security Division

FROM: 

Chief, Domestic Security Branch

SUBJECT: Proposed Executive Order on Intelligence  
Activities (U)

The attached implementing procedures intended to be used in connection with the proposed Executive Order on Intelligence Activities have been reviewed. Based on this review, it appears that these procedures provide adequate authority for Physical, Technical and Area Security (PTAS) activities. Specifically, paragraph II.e. authorizes the Agency to protect the security of installations, activities, information, property, and employees by appropriate means. The Agency is also authorized to conduct administrative and technical support activities necessary to perform various functions, one of which is protection of Agency installations, etc. Annex F of the implementing procedures specifically authorizes the Agency to engage in counter-audio training and operations. As currently written, there appears to be nothing in the implementing procedures which would preclude PTAS from continuing to do business as we are currently doing it. (U)
